

India's Population Distribution by Age (2022)

Task 01: Bar Chart – India's Population Distribution by Age (2022)

This chart visualizes India's population split into three age groups:

- 0–20 Years: 512 million (36.1%) – Represents the youth population.
- 21–64 Years: 807 million (57.0%) – Majority working-age group.
- 65+ Years: 98 million (6.9%) – Elderly population.

Insights:

- ✓ The working-age group (21–64) is the largest segment, indicating a strong workforce potential.
- ✓ The youth (0–20) also forms a significant portion, which may drive future growth.
- ✓ Elderly population is relatively smaller, but growing healthcare and support needs.

Conclusion:

This bar chart is ideal for conveying structured population segments using clear categorical data. It matches the official demographic breakdown and is best suited for reports and presentations.
